SUMMARY

Senior software developer with 6+ years of experience building scalable web applications with modern PHP and JavaScript frameworks. Skilled in solving complex problems, designing reliable systems, and writing clean, maintainable code. Experienced with CI/CD pipelines and effective collaboration across teams to deliver high-quality software.

SKILLS

Languages & Frameworks: PHP, Laravel, JavaScript, Vue.js, HTML5, CSS3, SCSS, TailwindCSS, InertiaJS

Databases: PostgreSQL, MySQL, MariaDB

DevOps & Tools: Docker, Git, GitHub, CI/CD (GitHub Actions), Webpack, Vite, Composer, NPM, Renovatebot

Code Quality & Testing: ESLint, Stylelint, PHPStan, Larastan, RectorPHP, Laravel Pint, PHP-CS-Fixer, PHPUnit, Pest, Vitest, Jest

EXPERIENCE

Clevyr, Inc.

Senior Software Developer

Oklahoma City, OK

June 2023 - Present

- Maintain 25+ GitHub repositories spanning production applications and shared internal packages; handle dependency updates and versioning across projects.
- Diagnose and resolve production issues under SLA across diverse client applications; scope and deliver fixes independently with minimal escalation.
- Lead development of support-driven feature requests across production applications; scope changes, clarify requirements, and implement within timelines and budgets.
- Champion adoption of Sentry and Laravel Shift by evaluating value, securing buy-in, and leading engineering adoption; improve error tracking and automate upgrades.

Leasecake

Team Lead - Senior Software Developer

Winter Park, FL

September 2022 - June 2023

- Designed and built backend for a complex data visualization feature using Laravel; defined frontend architecture and mentored a colleague on UI implementation in Vue.js.
- Improved time series query performance by ~70% by rewriting Eloquent logic to recursive SQL.
- Promoted frontend testing, implemented Laravel Pint, and contributed to Vue 3 upgrade planning during weekly engineering meetings.

Clevyr, Inc.

Senior Software Developer

Oklahoma City, OK

October 2020 - September 2022

- Architected and led MVP development of a digital mental health intake system (Laravel, Vue 3, InertiaJS); provided ongoing support and enhancements post-launch.
- Directed a team of four to deliver updates on an EU-built interactive 3D event platform (React, Three.js); established a new environment and shipped features on time.
- Scoped and launched a mobile app rewrite for a fintech client transitioning from Vue Cordova to Flutter; selected framework, aligned stakeholders, and handed off MVP.
- Mentored junior and senior developers across the engineering team, promoting best practices in Laravel, PHP, Vue, and TailwindCSS.

Clevyr, Inc.

Full Stack Developer

Oklahoma City, OK

September 2019 - October 2020

- Built a single-page application for a national sports organization using Vue 2, Vuex, SCSS, and Bootstrap; implemented real-time state handling and mobile-friendly layouts.
- Developed and enhanced features across multiple WordPress sites using Advanced Custom Fields, custom post types, and Gutenberg blocks.
- Delivered full-stack features in Laravel, Vue, and SCSS within a Kanban process; participated in sprint planning and ensured timely ticket delivery.
- Conducted manual browser testing to identify and resolve compatibility issues before release.

Liquid Fish

Full-Stack Laravel Developer

Oklahoma City, OK

May 2018 - September 2019

- Developed a single-page online ordering platform using Vue.js, Vuex, SCSS, and Bootstrap with server-side rendering and Algolia search.
- Integrated third-party APIs for payments, content, POS, and social engagement (Stripe, Novadine, Heartland, Subscription Genius, Facebook, Twitter, Instagram).
- Enhanced in-house CMS with publishing workflows, role management, and analytics features to improve editor experience and administrative control.

Century Martial Arts

Contract PHP Developer

Oklahoma City, OK

January 2018 - May 2018

- Migrated the Black Belt Magazine website from a legacy WordPress stack to a modern hosting platform with improved stability, security, and content management.
- Built a real-time event sign-in kiosk system using Slim PHP, Vue.js, and CSS3 with WebSocket communication to sync check-ins across kiosks and dashboards.
